How do I join my IP Address to a Minecraft Server? – To connect to a Minecraft server, you will need an IP address or host name of the server.

Connecting your Minecraft server via your IP address is the same as connecting to it directly through the internet without requiring any extra software. The primary way to get an IP address is by going into your internet browser's settings page and finding out what the current addresses given from your provider are for you. If you are using a Bukkit or Tekkit server, then this should be included with their connection instructions. With individual servers, there are a couple ways that you could go about getting this information. The first way would be to simply ask the host if you can connect to their IP address and they will give it to you. Otherwise, you can go through your router configuration page to find out the information that you need.",

The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you

Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders.",
